

Fox Equipment is located in Jacksonville, Florida and Cincinnati, OH. Fox Equipment has become a leader in the Dampers and Expansion Joints industry. Fox Equipment's clients have demanded that we address the issue of small high temperature butterfly valves for process gas applications.

Our clients wanted the feature of our dampers integrated into the design of a valve. Economic pricing, multiple design options and ease of maintenance were their main concerns. Therefore we have included the following standard features:

- Sizes from 4" Dia. Through 20" Dia.
- Flanges 150# ANSI with drilled lugs
- Damper Style Packing Gland
- Flanged Ball Bearings
- Machined Carbon Steel Housing
- SS Shafts
- Design Features 5 PSI / 450° F
- Manual Locking Lever Arm

#### Optional Features:

- Seals: Bar Stop, Tadpole
- Sleeve Bearings
- Design Temperatures for 800° F and 1000° F
- Flange to Flange thickness
- Bolt pattern
- Tapped Lugs
- Actuators: Manual, Pneumatic, Electric or Hydraulic
