Description

Fox Equipment fabrication facility is located in St. Augustine, Florida. The facility has been specifically designed to fabricate and assemble Dampers and Expansion Joints that meet the quality, cost and schedule requirements of each customer.

Our integrated **quality** assurance and **safety** plans ensure that our delivery to each customer is accurate, cost effective and complete.

Our facility has been configured to allow for the **flexibility** required to address many project types from small parts fabrications to large Guillotines, Double Louvers and Diverters.

The foundation of our success is our ability to employ efficient labor and utilize our equipment to the fullest extent while maintaining strategic vendor relationships; ultimately enabling us to deliver a **cost effective** solution for each customer.

CAPABILITIES:

Engineering: including structural, mechanical, electrical and drafting (AutoCAD 2010, 3D AutoCAD, Bentley AutoPlant and Inventor).

Material Preparation: including blasting.

Fabrication including steel processing, setup, welding and painting.

Assembly: including OEM and custom designed components, skid mounted systems and accessories.

Painting: including blasting, primer and finish coating.

Testing: including NDT and performance.

245 Binninger Dr., St. Augustine, FL 32095

RESOURCES

Facility

- 20,000 square feet
- Four (4) 16' x 16' rollup doors
- Bridge cranes (2 @ 5 ton capacity) with 19' hook height

Equipment

- High definition plasma table with 5 x 12 foot bed capable of cutting up to 1" steel plate
- 375 ton by 16 foot wide hydraulic press brake with CNC and back gage
- Ironworker
- Radial arm drill
- Band saw

Personnel

- 6 Engineers
- 3 CAD Technicians
- 1 CWI
- 12 AWS Certified Welders
- 4 Project Management
- 2 Service

QUALITY THROUGH ENGINEERING.™
